

Submission Summary

Conference Name

6th International Conference on Artificial Intelligence Driven Computing, Analytics and Networks

Track Name

Analytics (New)

Paper ID

483

Paper Title

MentorConnect - A Modular Web Framework Supporting Inclusive Mentorship and Knowledge Continuity

Abstract

Mentorship plays a significant role in motivating students towards success in their academic and career decisions, but the unavailability of a structured mentoring setting may limit access of qualified mentors. This paper proposes MentorConnect, a web-based mentoring system that allows role based access, interaction between mentees and mentors in a secure and scalable system. The suggested system is created on the basis of Python, Django, and Django Channels with SQLite as the storage backend. Its features are secure authentication and role-based access control, student profiling and academic activity management, and real-time interaction based on web socket-based messaging with file transfer. It is also used to control the session management, academic tracking, notifications and automated reminders to enhance coordination, and activity logging, to enhance traceability and system tracking. The system is considered to be validated and tested, as it allows more accessible mentorship, better communication, and better organization in comparison to the traditional informal process of mentoring. Additional improvements can involve the use of smart mentor recommendations, analytics, and specialized support on the mobile application in the future.

Submission Questions Response

1. Details of Author and Co-Authors

1. *I have added the details of all the authors of the submission in the submission form as well as in the submission file.*

2. *I am fully aware that editing of authors' list is not permissible at any stage.*

Agreement accepted

2. Propose Three Prospective Reviewers

It is a mandatory requirement to propose at-least three prospective reviewers who can review your submission.

Proposed reviewers should NOT be from the same institution as any of the authors of the submission.

Use the following format -

Name 1, Affiliation 1, Email ID 1, Research Area 1; Name 2, Affiliation 2, Email ID 2, Research Area 2; Name 3, Affiliation 3, Email ID 3, Research Area 3

NA

3. Declaration

I/We author(s) of this work declare that I/we have thoroughly read the Quality Policies of the conference as available on the conference website (<https://chitkara.edu.in/cse-can>), and I/we will abide by these policies.
